

Category	Waste Stream Examples
Groundwater	Remediation projects Construction projects Underground storage tank waters Dewatering projects Basement infiltration
Stormwater	Tank farm collection systems Oil/water separators Parking lot collection systems Landfill leachate
Industrial Water	Metals manufacturing streams Bio-tech process and rinse waters Pharmaceutical process and rinse waters De-ionization brine Nano- and ultra-filtration reject water Scrubber water Latex-containing wastewater Adhesive process water Ink and dye waters Photographic and print waters Glycols Emulsions Chemical manufacturing Coolants
Food Processing	Wash water Rinse water Condensate Cooking Oil/water mixtures Canning and bottling line water High strength organic streams Sugar water
Automotive	Spent anti-freeze (for recycling) Carwash waters Truckwash waters
Marine	Ship bilge water Barge bilge water Hull wash-down water <i>(includes streams containing bottom paint)</i>
Miscellaneous	Building and Bridge Wash Water Laboratory Waste Water Airplane De-icing fluids Skating Rink cleaning fluids Fire fighting water
